

endura[®]XL Grease Interceptor

Grease Monitoring Solution

We are pleased to announce the addition of a Monitoring System to the Endura[®] XL product line.

As jurisdictions move towards modernizing local requirements for the management of fats, oils, and grease, tools to ensure compliance are becoming increasingly important to the industry.

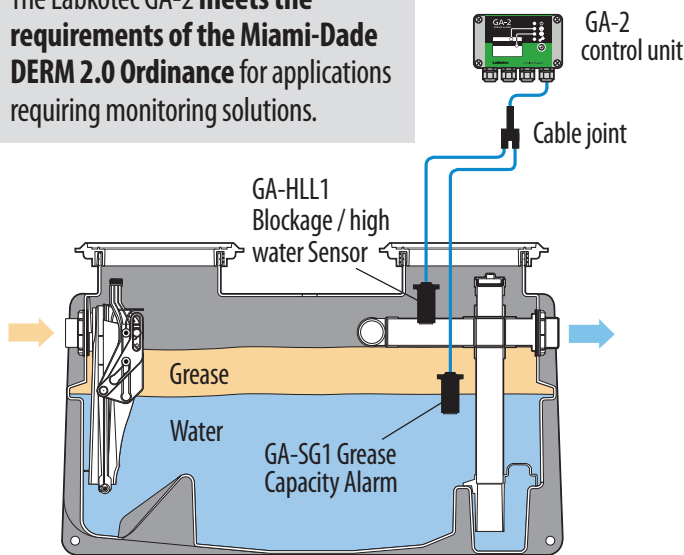

Introducing the Endura[®] XL Grease Interceptor Monitor and Alarm. This dual function solution monitors the status of the unit and alarms when it is time to schedule maintenance. It also safeguards the food service facility by monitoring for high liquid level events, which may signal a blockage and impending back-up.

Features and benefits:

- Audible and visual alarm when high liquid level or grease capacity alarm is activated
- Versatile solution with flexible installation parameters
- Certified to UL G101, CAN/CSA C22.2
- Compatible with facility management solutions

The Labkotec GA-2 meets the requirements of the Miami-Dade DERM 2.0 Ordinance for applications requiring monitoring solutions.

Installation guidelines are included with product.
