

DRAIN-GUARD™ DWV

Enabling improved safety & reliability in commercial drain, waste and vent (DWV) applications

Launched in the U.S. in November and soon to be in Canada, the IPEX DRAIN-GUARD™ Double Containment DWV System is ready to tackle the most demanding applications.

DWV applications can range from simple to demanding and back again. With over 50 years in the industry as leading suppliers of integrated thermoplastic systems, IPEX offers solutions no matter how complex the design or installation challenges.

Drain-Guard double containment piping systems provide safe transport of sanitary or storm drainage in critical areas. Should a leak occur, people, equipment and valuable property will be protected from possible harm.

Drain-Guard provides the secure environment necessary for piping in vital areas of a wide variety of buildings, including hospitals, museums, historical sites, libraries, art galleries, theatres, data centres, restaurants, and arenas.

Drain-Guard may also be integrated with the IPEX Centra-Guard™ Leak Detection System. This combination creates a complete and monitored double containment DWV system offering reliability and security against leak damage and its costly consequences.

Drain-Guard is an innovative addition to our family of Double-Containment Systems!

Applications Include:

- **Healthcare/Hospital Use**
- **Laboratory Applications**
- **High-Tech and Data Storage Environments (Network and Server Rooms, etc.)**
- **Museums and Libraries**
- **Airports**
- **Historical Sites**
- **Theatres/Restaurants (Public areas)**
- **Residential Buildings**
