

## **IPEX delivers industry-leading PVC junction box in sizes up to 16"**

**Oakville, ON – December 9, 2016** – IPEX Electrical Inc., a leading thermoplastic piping systems manufacturer, is proud to extend its Scepter® JBox™ junction box family to include new larger sizes of 14" and 16" in both standard and hinged cover options. These iterations follow the positive reception of IPEX's re-engineered junction box that launched in 2014 and offer electrical contractors the largest size of molded PVC junction box available anywhere.

"At IPEX, we celebrate innovation and quality service every day," said Alex Mestres, CEO of the IPEX Group of Companies. "The Scepter JBox is a great example of the forward thinking we put into products and our steadfastness in building on feedback from customers to perfect it."

The Scepter JBox product line includes the following features:

- Non-metallic, hand-close and quarter-turn fastener tabs
- Molded mounting feet for quick installation
- A lock-out option for added security on sizes 6" and larger
- A smooth inside flat cover to easily mount devices
- Gridlines for drilling conduit entry holes
- Injection molded and extruded, leak-free gaskets

The Scepter JBox Hinged Cover also features a removable cover that opens more than 200 degrees, providing contractors with complete and easy access to installed devices both in the cover and inside the box. NEMA 3R and 4X rated, it is suited for indoor and outdoor uses, industrial, maintenance and repair applications, as well as wash-down environments.
