

Junction Box: Pole Mounting Kit

PMK14-16SS | 277086

The PMK14-16SS stainless steel pole mount kit facilitates a quick and easy installation of a JBX junction box onto a pole, such as an outdoor utility power pole.

APPLICATION / USE

The PMK14-16SS pole mount kit is specifically designed for use with Scepter JBX junction boxes. This universal kit accommodates junction box sizes 14148 to 161610 for the secure attachment of JBX boxes to all types of poles. The PMK14-16 kit is shipped with two identical sets of brackets with all hardware for fastening to the JBX box and two sets of metal straps for securing to the pole. The PMK14-16SS can be used on wooden, concrete, steel and fiberglass poles of round, square and octagonal shape up to 15" in diameter. The brackets are constructed of plated galvanized steel and supplied with stainless steel hardware and straps providing robustness and are suitable for indoor or outdoor installations.
