

IPEX releases P-Trap Primer Connection Tee

OAKVILLE, ON – October 31, 2017 – The IPEX Group of Companies, a leading supplier of thermoplastics piping systems, is proud to announce the addition of the P-Trap Primer Connection Tee to the family of System 15[®], and System XFR[®] Drain, Waste, and Vent (DWV) systems for noncombustible buildings.

This is a welcome addition as a primed P-Trap prevents sewer gases from entering and moving within a building’s plumbing system. As water is exposed to the air, it is subject to evaporation over time in irregularly used floor drains; this leads to the release of sewer gas into the environment. The P-Trap Primer Connection Tee will mitigate this issue by adding Municipal water into the P-Trap to maintain a water seal that will protect a room or building from spreading sewer gases. This latest innovation to the System 15, and System XFR DWV product lines will provide additional peace-of-mind.

“The P-Trap Primer Connection Tee is another example of how we put innovation and our customers at the heart of everything we do,” said Paul Agapito, Marketing Project Manager, IPEX Management Inc.

Features & Benefits

- Easy to install
- Compact design
- Lightweight
- Long-Term Performance
- National Pipe Thread (NPT) water line connection
- Fire Rated, Flame and Smoke CAN/ULC S102.2
- CSA approved, CSA B181.2

IPEX DWV				
Product	System 15 [®] DWV		System XFR [®] DWV	
Size	3"	4"	3"	4"
Connection	H x H x ½" FPT			
Product code	326531	326532	526003	526011
