

NEW PRODUCT SHOWCASE

**Large Diameter System XFR®
14" – 18" is Now Available**

IPEX is proud to announce that System XFR is now available in 14", 16" and 18" diameter pipe and fittings. This is a welcome extension to our DWV family of products, including System 15®, Drain-Guard™ Double Containment, and MJ Grey™ Mechanical Couplings.

System XFR is rated for high buildings and air plenums where tighter Flame Spread and Smoke Development requirements of the Building Code have previously limited the use of thermoplastic.

Below is a summary of features:

Feature	System XFR Size Range 1-1/2" – 18" Diameter
Rated for High Buildings & Plenums	✓
CSA B181.2	✓
CAN/ULC S102.2	✓
Range of Sizes	✓
High Impact Resistance	✓
Improved Flow	✓
Lower Thermal Conductivity	✓
Corrosion Resistant	✓

Why are DWV systems from IPEX becoming the new standard? As an integrated solution, they meet all code requirements for noncombustible buildings. More importantly, they provide the required rugged reliability with all the added benefits of being a thermoplastic.
