

IPEX PVC Ventilation Duct Fittings

NEW PRODUCT SHOWCASE

A Fitting Addition

IPEX USA LLC is pleased to introduce our new range of PVC Ventilation Duct fittings, available in 6" through 24" sizes, complementing our already existing range of PVC Ventilation Duct pipe.

IPEX PVC Ventilation Duct safely conveys exhaust fumes generated by various industrial processes, protecting workers and avoiding any inherent dangers to the work environment from contaminated air.

PVC VENTILATION DUCT	AVAILABILITY
Pipe & Fittings Size Range	6", 8", 10", 12", 14", 16", 18", 20", 24"
Fitting Types*	Tee, 90° & 45° Elbow, Coupling, Cap, Wye, 90° & 45° Pant Leg, Flange, and Butterfly Damper

* Additional fittings are available upon request

Features & Benefits:

- Fittings are of seamless, uniform construction, providing an aesthetically pleasing appearance and closely matching the uniform profile of extruded IPEX PVC Ventilation Duct pipe
- Fittings have smooth interior walls promoting unimpeded exhaust flow, reducing bacterial and biological solids build-up and reducing turbulence and static pressure loss
- PVC withstands exhaust temperatures up to 140°F (60°C)
- Lower installation cost when compared to noncorrosive metallic options
- Lightweight fittings allow for faster installations with simple tools and pipe joining techniques
- Low maintenance requirements over extended service periods

Applications:

- For use in industrial and institutional fume handling systems requiring high resistance to corrosive vapors
- Water & Wastewater Treatment
- Chemical Processing
- Food & Beverage
- Pharmaceuticals
- Metal Plating & Finishing
- Laboratory Installations
- Pulp & Paper
