

Polyethylene Pipe-with-the-Stripe®

IPEX Pipe-with-the-Stripe® is the preferred choice amongst polyethylene pipe users in Canada. The smooth interior of Pipe-with-the-Stripe virtually eliminates interior scaling or deposits from aggressive water; the water supply line stays cleaner longer – providing optimum water quality. Pipe-with-the-Stripe is also very flexible, ideal to withstand underground soil loads from frost or settlement.

Applications

- Waterwell Tubing
- Irrigation Systems
- Maple Sap Collection
- Ice Skating Rinks

Pipe Pressure Ratings

Color	psi	kPa
Utility Black	50	345
White Stripe	75	517
* Red Stripe	75	517
Blue Stripe	100	689
* Green Stripe	100	689
Black Stripe	100	689
(Poly blue)	160	1103
'Super D'	200	1379

* Pipe certified to CSA B137.1 for potable water

Dimensions

Nominal Size		Average Inside Diameter	
inches	mm	inches	mm
1/2	12	0.62	15.8
3/4	20	0.82	20.9
1	25	1.05	26.6
1-1/4	32	1.38	35.0
1-1/2	40	1.61	40.8
2	50	2.06	52.4

Note: For wall thickness dimensions, contact IPEX

Features and Benefits:

- Permanent, extruded coloured stripes to identify CSA or Standard pressure ratings
- Coloured strapping on coils to match stripe colour and assist in easy identification for storage and shipping
- Sequential footage marking for easier cut measurements
- Made from Low-Density PE resin to maintain flexibility in colder months
- Large safety factors for burst strength, i.e. 4x for CSA and 3x for Standard
