

IPEX DK Series Pneumatic Diaphragm Valve

The Pneumatic Diaphragm Valves offer a piston style actuator across our entire line of DK valves. Each actuator comes with a standard optical position indicator to allow for a visual check of the valve position as well as a custom labelling plate housed in a transparent cap.

IPEX DK Series Pneumatic Diaphragm Valves are the ideal solution for modulating flow and controlling dirty or abrasive fluids in a variety of applications. The modular nature of this valve results in many material, body style, and diaphragm options. The re-designed weir-style body has significantly improved the DK's flow rate compared to the old design and it facilitates precise linear flow regulation through the valve's full range of operation. This pneumatically actuated version provides automatic control with an extensive range of options and accessories.
