

NEW PRODUCT SHOWCASE

1-1/2" TailPiece Adapter

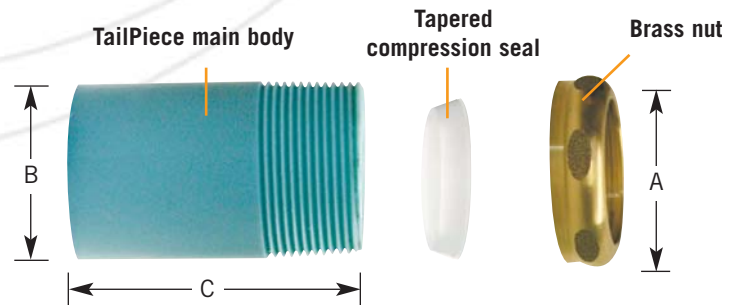

IPEX is pleased to introduce our new TailPiece sink adapter to our Enfield™ and Labline® Acid Waste product lines. The adapter allows for an easy connection between industry – standard spigot sink outlets and our Enfield™ electrofusion or Labline® mechanical joint systems.

The new IPEX TailPiece adapter is manufactured using chemically resistant flame-retardant polypropylene.

The adapter is 1-1/2" in diameter and is offered in two lengths: a standard 3" and an extended 12" size. The 12" extended TailPiece may be cut to custom lengths to accommodate all construction designs. A tapered compression polyolefin seal and brass nut complete the assembly.

The new TailPiece adapter further enhances our comprehensive offering making it even easier to connect any material/system-components to the Enfield™ or Labline® systems.

For further information and pricing, please contact your local IPEX representative.
