

NEW PRODUCT SHOWCASE

1-1/2" FRPP Swivel Sink Strainer Adapter with Gasket (Spigot x Female NPT)

Now available
in 12" lengths

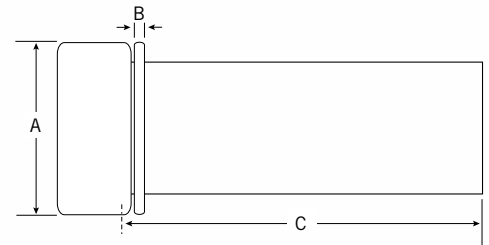

IPEX is pleased to introduce a new member to our Enfield™ Acid Waste product line with the addition of our Swivel Sink Strainer Adapter. The adapter allows for an easy connection between IPEX cup sinks, industry-standard threaded sink outlets and our Enfield electrofusion or Labline mechanical joint systems. The adapter is available with a straight spigot for Enfield fusion joints or can be grooved for Labline mechanical joints; and is manufactured using chemically resistant flame retardant polypropylene (FRPP).

This 12" length adapter provides more flexibility in spacing your system by allowing you to simply cut it to suit your needs.

For further information please contact your local IPEX representative.

Enfield P Trap / Sink Assembly W551
Also suitable with Labline® P Trap

The swivel sink strainer adapter can be screwed directly onto the threaded sink outlet. The Viton® gasket creates a chemical resistant "liquid-tight" seal with the sink outlet. The spigot end inserts directly in to any 1-1/2" Enfield or Labline fittings.
