

SYSTEM 636® PVC 2-1/2" FITTINGS - PRODUCT LINE EXTENSION

PRODUCT INFORMATION BULLETIN

PERFECT COMPLEMENTS

A number of appliance manufacturers today include 2-1/2" venting systems as a viable option.* To meet this demand, IPEX is happy to announce an extension to our 2-1/2" fitting offering. These key fittings will allow for easier transition from appliance to flue gas venting system along with improved flow.

Two unique fittings have been added to the 2-1/2" System 636® PVC fitting category:

new 2-1/2" x 2" Appliance Adapter:

- It replaces the three-piece reducer bushing alternative for upsizing to 2-1/2"
- By having less number of components to install, contractors will save time and money
- The extended spigot allows for easier installation into the appliance
- The compact design minimizes the distance from appliance to the transition

FGV APPLIANCE ADAPTER H x SP

| | inches | mm | Product Code |
|-----|-----------|---------|--------------|
| PVC | 2-1/2 x 2 | 65 x 50 | 196302 |

new

2-1/2" 90° Long Radius Elbow:

- Reduced frictional loss is achieved in comparison to the short sweep 2-1/2" 90° elbow
- The fitting is designed for optimal vent air flow

FGV 90° LONG ELBOW (2-1/2") H x H

| | in | mm | Product Code | | in | mm | Product Code |
|-----|-------|-----|--------------|---------|------|-----|--------------|
