

# P-TRAP PRIMER CONNECTION TEE

## NEW PRODUCT SHOWCASE

### PRIMED TO PERFORM

IPEX is pleased to announce the addition of the P-Trap Primer Connection Tee to the family of System 15®, and System XFR® DWV product lines.

This is a welcome addition as a primed P-Trap prevents sewer gases from entering and moving within a building's plumbing system. As water is exposed to the air, it is subject to evaporation over time in irregularly used floor drains; this leads to the release of sewer gas into the environment. The P-Trap Primer Connection Tee will mitigate this issue by adding Municipal water into the P-Trap to maintain a water seal that will protect a room or building from spreading sewer gases.

This latest innovation to the System 15, and System XFR DWV product lines will provide additional peace-of-mind.

**SYSTEM 15® DWV**  
**SYSTEM XFR® DWV**

### Features & Benefits

- Easy to install
- Compact design
- Lightweight
- Long-term performance
- National Pipe Thread (NPT) water line connection
- Fire Rated, Flame and Smoke CAN/ULC S102.2
- CSA approved, CSA B181.2
